ENJOY SCENT DIFFUSERS

THE EMOTION OF YOUR TAILORED SCENT

The language of scents is invisible but it always tells us a story. Through a custom fragrance we recognize and we are recognized with an olfactory photography and a unique emotional combination.

SCENT PERFORMANCE

After a signature scent is designed, it is important to catch the right delivery method to diffuse it in the brand environment, in order to appreciate the depth of a custom fragrance.

Olfactory branding personalization gives life to the Scent Company olfactory architectures, which however, could not live without the support of a diffusion system that can harmonize the fragrances with the spaces to be scented. This is the reason why the design and development of the scent systems begins with an accurate assessment of the environments that will allow to identify the most effective type of installation according to architectural features and client needs.

The appliances, in fact, can be either exposed, mobile and freestanding, wall-mounted or concealed, thus directly connected with the air conditioning or ventilation system in place.

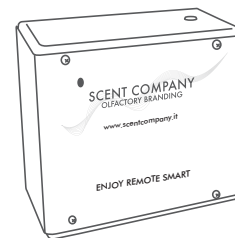

Discover and choose between our leading, high-tech, user-friendly scent diffusers.

ENJOY SENSITIVE LUX

ENJOY REMOTE

Enjoy Remote is a **HVAC scent diffusion system**, working with the principle of **Nebulization**. It comes in compact in size, and is extremely silent. Its main feature is the **GPRS integrated system for a remote control**, to ensure consistent fragrance levels and results.

Enjoy Remote, with a scented capacity of **up to 1200 m³**, allows scent diffusion in large open areas through HVAC, making it perfect for large public areas, lobbies and common spaces of hotels, SPAs, department stores and retail stores.

gh HVAC, making it perfect for large public areas, lobbies and common spaces of hotels, SPAs, department stores and retail stores.

REMOTE CONTROL

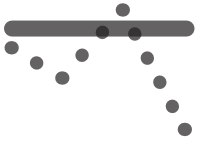

High-Tech, powerful, connected to the HVAC system and remotely controlled using your PC, smartphone or tablet. It gently fills the brand environment with an invisible pleasantly persistent scenting.

ENJOY REMOTE

Remote Control

The GPRS system allows a real-time remote control of the scent system by using a computer, smartphone or tablet. Customer can download the Scent Company APP, connect to the scent diffusers remote portal and therefore control the scent system functioning anytime and everywhere.

Constant Fragrance Results

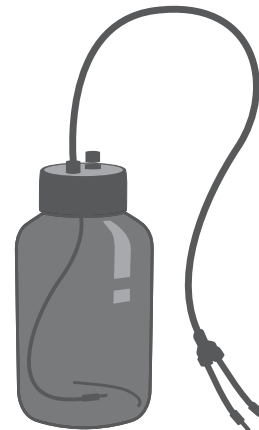

Thanks to the remote control, it is possible to schedule and regulate, from distance and with an immediate effect, the scent diffusion times and intensity, from morning to night.

Connected to the HVAC System in place

Enjoy Remote connects to the HVAC system in place, making it perfect for the scent diffusion in large open areas.

* 2X External Venturi Systems
